REPORT OF THE SCHOOL BOARD.

For the Year Ending March 1, 1894.

To the district and town of Chesterfield:

The schools have been generally prosperous the past year; some more than usually so, and all have made fair advancement.

The misplaced teacher, negligent parent and truant child have occasionally been found, and, as always occurs, they have blotted the registers, marred the discipline and retarded the prosperity of the schools with which they were connected.

Our common schools being "the people's college," from which ninety per cent. of our children receive their education, it behooves us to work together to raise them to a higher standard; and especially is it incumbent upon the parents to see that their children attend the school sessions upon all possible occasions, so that the school funds may not be wasted through irregular attendance, and classes held back on account of the tardy and straggling pupils.

Far back in the olden days of Rome, the emperor Titus bemoaned a day lost in which he had failed to perform an act of kindness; and we most certainly have lost our day of life, if we fail to furnish every available facility for the thorough education of our children, morally and intellectually.

In this age of advancement, we should not be content to let our schools remain in statu quo, but, by improving the means of education, by larger appropriations, and, consequently, better teachers, longer schools and increased interest,

be able to feel, as we slide down the incline of life, that we leave the town better than we found it.

At the last annual meeting, a sum of money was appropriated to build a woodshed for school No. 7, which, in due time, was completed, within the amount appropriated; a neat, commodious and much-needed improvement, and highly appreciated by the patrons of the school.

The coming year will require no large expenditure on buildings, but in and upon several of the schoolhouses, repairs will be needed.

Smoky chimneys, unsafe stovepipes, and useless decay of houses, for lack of paint, will require a small outlay beyond what can be legally used from the amount usually appropriated for the support of schools.

Your board would therefore recommend the raising of a sum of money, to be drawn upon as needed, by a committee appointed to determine where, when and what repairs are needed, and empowered to supervise the same.

A mistake in regard to the amount of money appropriated at the last annual meeting for school purposes, necessitated the closing of two of the schools at an earlier date than contemplated — Nos. 5 and 7 — each being shortened one week in the winter term.

The number of children in town between the ages of five and fifteen years, as reported by the selectmen in April last, was 136.
